	S T U		SI		FAIR	
	V					
	X Y Z		1		POOR	

### GIA GEMOLOGIST GRADING REPORT

Shape	Brilliant Round		Country of Origin	United States
Date	08-31-2020	08-31-2020		DF2000770
DIAMOND	PROPORTIONS		DIAMOND GRADES - THE 4CS	
Depth	61.4%		Carat Weight	2.1
Crown Height	14.62%		Color Grade	I
Crown Angle	34.2°		Clarity Grade	VS1
Pavilion Height	43.18%		Cut Grade	Excellent
Pavilion Angle 40.92°			ADDITIONAL GRADING	
Table Diameter	57%		Polish	Excellent
Girdle	Medium		Symmetry	Excellent
Measurements	8.22 x 8.25 x 5.06mm		Fluorescence	None

## GIA GEMOLOGIST

Justin Kongsinsap

who has successfully met the requirements, thus earning recognition as a

Graduate Gemologist

Issued by the Board of Governors, upon recommendation of the faculty, with all the rights and privileges belonging thereto.

Given at the Robert Mouawad Campus, 5345 Armada Drive Carlsbad, California, on March 19, 2004

### **CERTIFICATION**

# This Certificate is guaranteed by Diamond Foundry:

In the unlikely case that your diamond turns out to not meet or exceed a 4C grade stated in this Certificate, Diamond Foundry shall, at its option: Accept the return of the diamond and provide you with a refund of the full purchase price; or replace the diamond with a diamond that meets or exceeds each of the characteristics warranted.

If you make a claim under this Warranty, you must allow Diamond Foundry to: examine the original copy of the Certificate; try and resolve your claim amicably; inspect the jewelry and any gemological evaluation on which you base your claim; remove the diamond from the jewelry for gemological examination. Diamonds must be graded as loose stones by an internationally recognized diamond grading lab. Since the diamond grading process is a subjective science, your claim is only warranted if the internationally recognized diamond grading laboratory grades your diamond at least two grades lower in color and/or clarity.

The condition of the diamond will be determined by examination under no greater than 10x magnification and by standard gemological techniques. The accuracy of angles and linear measurements will be determined by the following tolerances of  $\pm 0.2^{\circ}$  and  $\pm 0.02$  millimeters.

This Warranty remains in effect in perpetuity with the original purchase proof. It covers the lack of conformity of the diamond with the 4C grades stated on this certificate at the time of sale. It does not cover damage to the diamond that occurs after delivery including normal wear & tear, cuts or scratches, consequential or incidental damages provided or allowed by an insurance coverage. This Warranty is not transferable and only applies to the original purchaser of the product. Your claim is only warranted if the internationally recognized diamond grading laboratory grades your diamond at least two grades lower in color and/or clarity.

This warranty gives you specific legal rights; it does not, in any way, affect the rights given to you by law.

Note that the Gemological Institute of America (GIA) expressly does not offer any guarantee for its own grading reports.
