The laboratory grown diamond described in this Report ('Report') has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and Iduationary grown administration of the final rules essentially time soline treemings, physical units optical properties as a mined admanda, with the exception of being grown by main (a manufactured product). (G.I. employs and utilizes those techniques and equipment currently available to (G.I. including, without limitation, 10X magnification, corrected triplet loups). broadule to "oscillar includes" in motion a minimum to the strategy includes a contract-optical measuring of the strategy o features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
