The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (GLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined alamond, with the exception of being grown by man (a manufactured product). (GLI employs and utilizes those techniques and equipment currently available to I.S.I. including, without limitation. 10X magnification, corrected measuing device, Diamond Sure¹¹, Diamond View¹¹, Spectraphotometer and such other instruments and/or processes as deemed appropriate by I.G.I. This Report includes adspect to the importance of and interrelationship between cut, color, clarity and carat weight.
