This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesarchized by International Geomological Institute (LGD). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are hyplacially produced by CVD (chemical vapor deposition) or by HPHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. [GI utilizes the most advanced techniques and equipment currently variable including, binocular microscopes, didiamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIRI, UV-VIS-NIR, urman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report (GI does not agree to such severe from a precional promoter or progression and by making the report (GI does not agree to such case or the article.
