The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI") in its own laboratory. IGI's analysis was limited to the chemical, physical and optical properties as mined diamonds, with the exception of being grown in a man-made environment. IGI is a diamond manufacturer and utilizes those techniques and equipment currently available to IGI, including, without limitation, 100x magnification, corrected eyepieces, gemological microscopes, spectrometers, ultraviolet light, ultraviolet measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
